

Project title (initiator):

SKARABEY

«TECHPRIBOR» Enterprise (LLC «Desintegrator»)

Sector profile:

Engineering industry

<p>Project concept: Creation of production facilities for serial compact lines production of solid biofuel manufacturing made of plant waste.</p> <p>Project goals: Wood, crop growing waste and about fifth of all the housing-and-municipal waste products in the Tula region can be processed into solid biofuel or fuel pellets.</p>	<p>Project orientation and accomplishment effect: 20 new workplaces will be created, the expected tax proceeds will make 42 million roubles pro year. Besides that, the market appearance of the compact equipment for the biofuel production will allow to the subjects of small and midsize business to organize processing of wastes "at local level", besides the solving of ecological problems, it will also provide creation of new workplaces.</p> <p>Project data: Investment volume – 101 683,08 thousand rub. An investment phase is 12 months (the term of assembling plant building for «SKARABEY» lines production).</p> <p>Current rates of company's (initiator's) business: The company conducts the activity since 2005, has stable financial state, the 2016 income increased 45% in comparison with the previous year, the company produces the wide assortment of impact centrifugal mills, crushers and conveyer equipment. Since 2010 the company conducts the development of the biofuel production equipment.</p>
<p>Contacts: Business manager LLC «Desintegrator» Weksler Maksim Vladimirovich Tel. 7-905-626-79-10</p>	<p>Investments attraction terms: Desired conditions of the investments attraction – share of the authorized capital.</p>
<p>Project current status:</p>	

The development of the «SCARABEY» lines documentation and the tests of pre-serial pieces are completed. Since August 2016 the production program of the small-scale production of two «SCARABEY» lines pro month on the «TECHPRIBOR» productive sites has successfully been realized. In the marketing part of the project the «SCARABEY» lines web-sites in Russian, English and German were created. (agrotopivo.ru, scarabeyline.com). An advertisement company in the internet has been settled. The «SCARABEY» line participates in the special Russian Export Center marketing programs of Russian commodities in the foreign markets promotion. Since February 2017 the "SCARABEY" line has been placed and actively offered on the largest world trader of Alibaba.com site.

In 2016 9 lines, one of which was forwarded to Indonesia, became the result of the executed work. In 2017 till the present moment (February 2017) 4 more machines have been shipped. The customers of these lines are both representatives of small and large business, for example, LTD «Korol' Divanov» (Trade Mark «Mnogo Mebeli»), JSC «PRIOSKOLYE», LTD «STARATELY»

For realization of the project on the increase of production capacities on lines producing the land and the building of former boiler room was bought. On the bought land the works on locality planning were conducted, in the building of boiler room the old equipment was dismantled. Also the project of reconstruction the building into production department for the «SKARABEY» lines production was developed. The «TECHPRIBOR» factory is actively looking for an investor for this project realization.
